Newsletter 87: Made-to-measure melting and tempering kettles

A happy New Year !

Let us start with good wishes. In this newsletter the Prefamac melting kettles and tempering machines are proposed. In the coming months a lot is planned in our production, but also flaking machines, enrobing machines and cooling tunnels. A visit will thus certainly pay off. Political party head Gwendolyn Rutten came to see the new building. And we had a very good conversation with her about creative entrepreneurship and innovation. For 2018 nothing but good, especially with the Swirl, a beautiful new chocolate mould that will make it in the new year. For 2017 we look back on the royal trip to India and the continued sponsorship of Lego League for the students. We also wish you a lot of viewing and reading pleasure in 2018 with our newsletters.

Myriam Schepers
Managing Director

Peace and happiness in 2018

We wish you this year a peaceful and joyful 2018. No winner of the Lotto of 1 million or a world tour of 365 days. No ... ordinary things that make you happy, and keep you healthy, ... and motivate you every day. And yes ... we think that your pralines and cookies can do a lot of good for everyone in the whole world :-) !!

Made-to-measure melting and tempering kettles

Dellestraat 11/11a
Industrial Zone Zolder-
Lummen 1058

F: +32(13)52.18.48
info@prefamac.com
www.prefamac.com

Prefamac Chocolate Machines produces melting kettles of 100, 170, 240, 500, 1000, 2000 to 5000 liters (<http://www.prefamac.com/en/industrial-melting-mixing-kettles>), but the customized kettles and / or the combination with piping and chocolate pumps are very popular. No construction or a platform seems impossible to us, so we can really help our customers with a lack of space (don't we all have this problem?).

At [more photos](#), we show only a few examples with also filters, and in addition the batch tempering machines of 100 and 150 kg, plus the continuous tempering machines up to 1000 kg per hour. Very convenient, super good quality, and ... for everyone's budget. The starters, the growers, the industrialists, ... they can all be helped at Prefamac.

[Visit us when it suits you](#)

In the coming months ("no, actually continuously :-)", we have again planned various artisan machines and even more industrial projects. Via www.prefamac.com you can already view the various machines. On 23/03/2018 we have planned the opening of our new building, but before or after you are always welcome. Be sure to bring your chocolate or biscuit products with you, then we can also advise you how to become even more flexible or creative in 2018 or 2019 !! Our delivery times are a bit longer because the economy is running well, but for 2018 there are still 'many many' possibilities.

Click on [more photos](#) where we will show you besides mobile curve bands, also enrober machines where the color chocolate can easily be changed. Or cooling tunnels that take into account a low ceiling and yet many crumbs that need to be cleaned regularly.

Gwendolyn Rutten visiting

Politicians sometimes consult entrepreneurs with experience. In 2018 Prefamac celebrates its 30th birthday, so yes ... that is certainly experience. Party chairman Gwendolyn Rutten from O-VLD already came to inquire. About innovating in an SME, exporting to more than 100 countries, fair taxes, theft prevention, labor costs, art at work, etc. On the picture you can see her with some very honored construction workers.

At [more photos](#) we show the first internal views of our new test room, where we will soon show our innovative machines 'confidentially for your new product'.

Swirling to 2019!

Starting the year in a swinging fashion and SWIRLing setting a new trend. Not a traditional chocolate bar, but really one with character. A tablet that shines through the shiny slopes, and stimulates the up and down movements with every bite. A 100 gr product to really get energy again. The matching round SWIRLR and rectangular SWIRLL complete the beautiful set. Have you ever looked at the shiny CURVO, CURVL, TEARH and TEARL to get inspiration until the beginning of 2019?

At [more photos](#) you can already forge your new plans! A direct link <http://www.prefamac.com/webshop/default?lang=en> to our moulds can help you.

Thank you India !

In November of last year, I had the honor to visit the beautiful New Delhi and Mumbai in India together with our King Philippe and Queen Mathilde of Belgium. The week started with a unique visit to the Taj Mahal. The Rashtrapati Bhavan (Presidential Palace), the President, various Ministers, India Gate Memorial, but also Microfinance, cocoa farmers, child labor and a visit to the street children were discussed/organized. I personally sat in a panel discussion of "Belgian Innovative Contributions in shaping India's future as a Global Food Player". Thank you India for the many possibilities and opportunities between our two countries, and the cosy Networking High Tea's that you organize !

Unfortunately, at [more photos](#) we can only show a few unique moments of this exquisite reception.

And we continue to sponsor Lego League

Young people trump at Prefamac! Also in 2018 we remain silver sponsor of the Lego League. An international competition organized for young people from primary education, to teach them the "enthusiasm" in technology at a very young age. In these rapidly evolving times, we will have a greater need for the future, for young people who are familiar with technical knowledge and expertise. And yes ... we always search for them at Prefamac! Congratulations to the winners around the world, but every participant has actually won here. And for gifted young people who find it difficult to find their way for this we work behind the scenes, also in the new year.

At [more photos](#) you can enjoy the dynamic emerging talent!
